# System Analysis & Design

## Tutorial 06

# Agenda

WIUT

1. Previous tutorial recap
    1. Requirements gathering
2. Prototyping

# Previous tutorial recap

WIUT

1. Types of requirements.
2. Requirements gathering techniques.
3. Requirements gathering method.

WESTMINSTER
International University in Tashkent

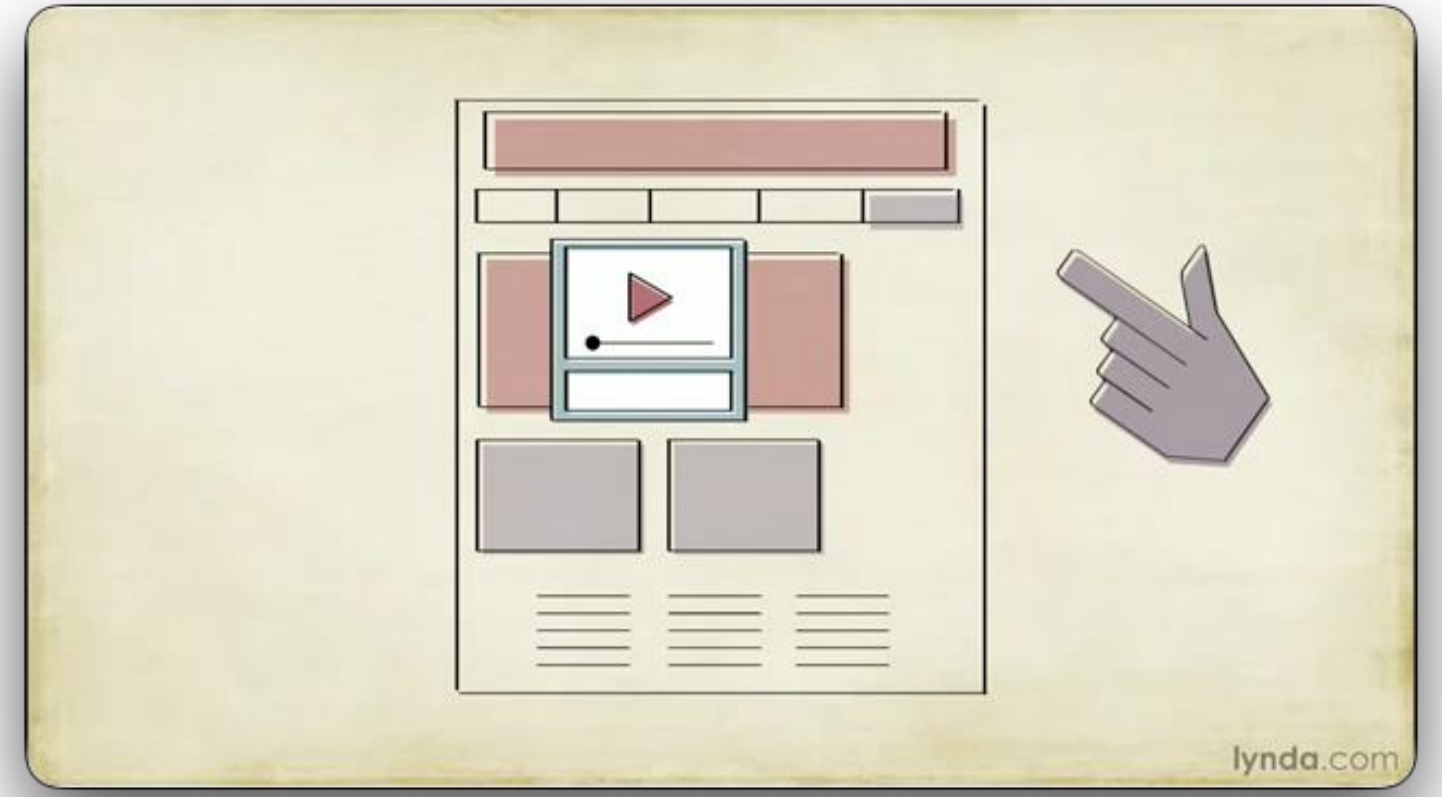

An Accredited Institution of
the University of Westminster (UK)

# Prototyping

## Building prototypes.

# Prototyping

WIUT

# Prototyping tools

WIUT

There are many free prototyping tools (descktop and web):

- Figma
- Wireframe.cc
- Adobe XD
- Sketch
- Etc.

# Prototyping tools

WIUT

- We will use Figma.
- It is industry standard.
- It’s available on the web and desktop. As well as on all major operating systems.
- It’s free, with paid features. You can get paid version by verifying you are a student.

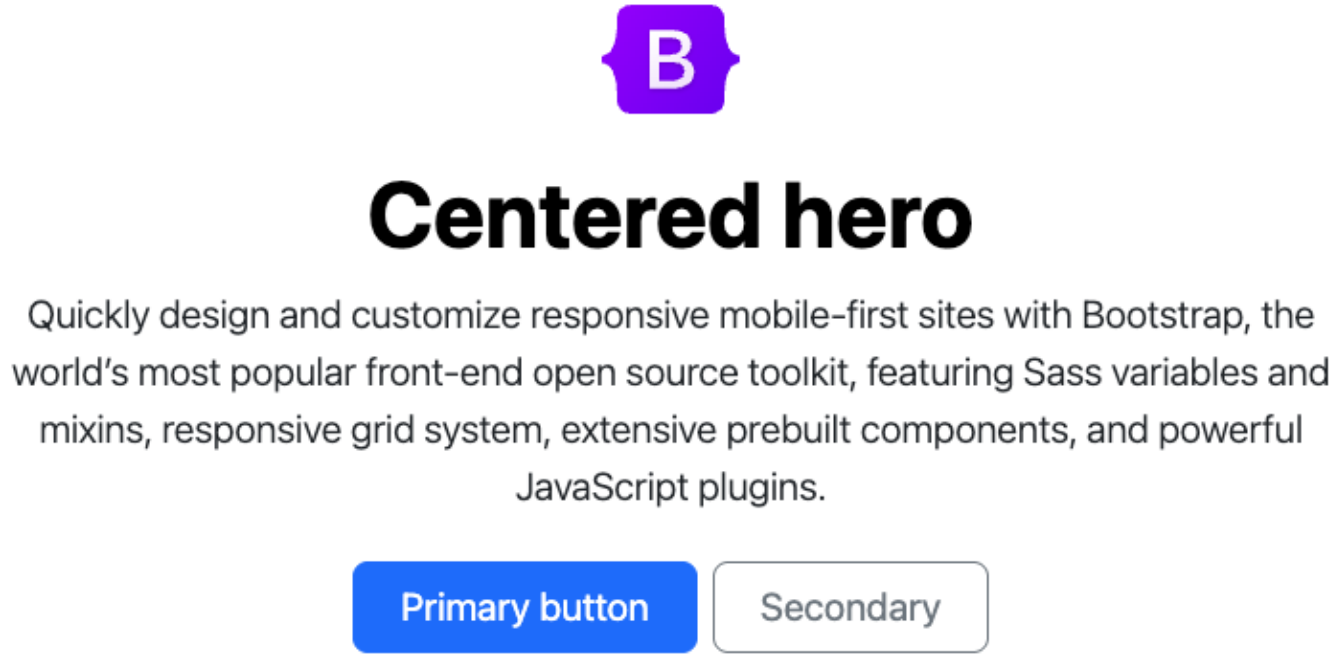

# Exercise: Simple UI elements

WIUT

1. Go to figma.com
2. Create an account.
3. Create a new “Design” project.

# Exercise: Duplicate UI elements

WIUT

# Exercise: Duplicate UI elements

WIUT

## Vertically centered hero sign-up form

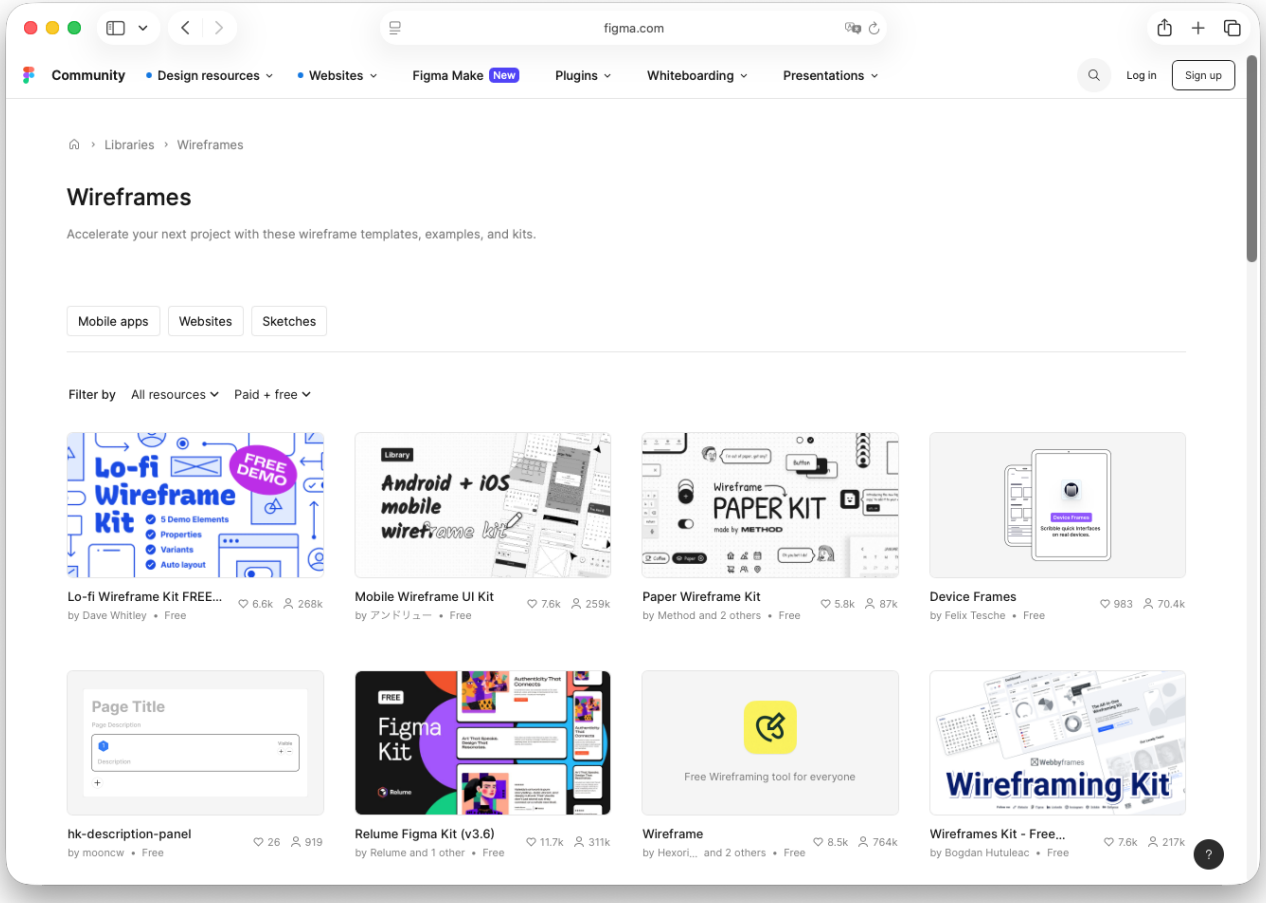

Below is an example form built entirely with Bootstrap's form controls. Each required form group has a validation state that can be triggered by attempting to submit the form without completing it.
